

## Single chamber cleaning machine

Compact solution for washing, rinsing and quick drying

SWISS  
MADE 

### Technical specifications

- Length 3600 mm
- Depth 1500 mm
- Height 2300 mm
- Vertical oscillation Programmable
- Rotational speed 0 to ~ 500 rpm
- Chamber temperature 20 to 70°C +- 5°C
- Drying temperature 20 to 160°C, programmable
- Ultrasounds 25/45 kHz, programmable
- Ultrasounds strength To 200 [W/L]

### Advantages

- Ground space saving
- Single, custom-made working chamber
- Possibility to easily move the machine
- No pollution between the different chemistries
- Washing and drying operation, better quality and productivity
- Total traceability of the various operations and programs used
- Spraying or immersion cleaning with high power dual frequency ultrasounds
- Rotary movement of the spindle and planetary movement of the baskets
- Energy saving by automatic stop of the machine and thermal isolation of the storage chambers
