

Belt inline cleaning machine

Compact solution for washing, rinsing and continuous fast drying

Technical specifications

- Length : 1000 mm
- Depth : 1000 mm
- Height : 2300 mm
- Continuous belt guidance system
- Control of the belt feed speed
- Coalescence oil separator with recovery tank
- Upper, lower and side wash nozzle module
- Pump for washing with DI water up to 70°C
- 100 L tank for DI water with level control
- Tank insulation with gas between the walls
- Drying nozzle module
- Drying turbine
- Water filling/drainage pump DI
- Programmable start and stop of the machine
- Automatic standby and shutdown of the machine
- Conductivity measurement of water DI
- Acoustic insulation

Benefits

- Low ground occupation
- Easily movable machine, chassis mounted on wheels
- Operation with hot water only (no detergent)
- High pressure turbine drying
- No consumable items on the machine
- Very low water and power consumption
